

Digital Signage Solutions for Manufacturing

Discover where, why and how to use Digital Signage in Manufacturing

The manufacturing sector accounts for nearly 2.5M jobs in the UK, and Digital Signage plays an important role within these environments, from communicating with visitors on their arrivals to engaging with colleagues who are not always desk bound. In addition to all the communication benefits, digital signage provides to the sector, it also aides in improving an organisations sustainability impact by reducing the carbon footprint provided by printing less.

Why use Digital Signage in Manufacturing?

- ✓ Welcome Visitors
- ✓ Increased Productivity
- ✓ Engaged Staff
- ✓ Improved Workplace Safety
- ✓ Enhanced Corporate Communications
- ✓ Manage & Control Content Remotely

Reception Screens

In any organisation, the reception desk is often the first point of contact, meaning it is the ideal place to make a lasting first impression. Welcome your visitors with reception signage by easily scheduling a personalised message for the time you know they are arriving and also showcase your company's work, achievements and company values. This lets them know their visit is appreciated and welcome.

Noticeboards

Traditional notice boards, with paper based posters, signage and warnings, are usually overcrowded. Digital Signage allows organisations to provide a variety of communications to colleagues that engages their interest and therefore improves re-call and impact. This varies, from health & safety messages, to company brand values and display real time key performance indicators.

Colleague Communications

Communicating with colleagues, re-enforce culture and value messages, support communications to your colleagues and highlight key information of the week such as important upcoming meetings and even colleague birthdays.

Using digital signage as a communication channel ensures key messages are relayed to colleagues that engages and focuses attention.

Don't just take our word for it

Digital signage gives employers the opportunity to share important information with their workers, colleagues and visitors, quickly and regularly to help improve efficiencies and engagement.

Digital signage improves workplace engagement by 22%, leading to 41% fewer quality defects

Nine out of ten manufacturers use digital signage solutions to reinforce employee training and increase productivity

Health and safety communications through channels like digital signage result in reductions of 20% or greater in their injury and illness rates.
