Monitors

Whiteboards

HI-DEF VIDEO AND SOUND DIRECT TO YOUR TV, MONITOR OR PROJECTOR

Turn your Android device into a TV ready media streamer

Do you use a Samsung S2/S3 or the new S4 Smartphone? Do you use an Android tablet such as the Google Nexus or other tablet computer? Would you like to stream your saved hi-def, 1080p movies, tunes or games to your existing TV?

The new LMS Data **USB-MHL-HDMI-X** is a feature-rich, totally plug n' play without the need for drivers adapter that converts your Android's built-in micro USB charge port into a high-performance HDMI interface, so you can simply connect to your TV, monitor or project's HDMI input and enjoy your Android's device features on the big screen!

With a generous 185cm total cable length and the ability to power and charge your Android device simultaneously, this is the must-have connectivity option for all Android users.

Advanced features..

- 1080p MHL to HDMI cable with built-in USB charger
- Compatible with Samsung S2/S3/S4, Note 2 etc
- Compatible with Google Nexus tablet etc
- Supports newer 11-pin and legacy 5-pin MicroUSB
- 7.1 channel sound, 192KHz audio connectivity
- Generous 185cm (approx.) cable length
- Low-profile design with robust protection boot
- Ideal for movie, gaming, photo and audio streaming
