AMAZING AUDIO, WIRELESSLY – VIA BLUETOOTH® STREAMING

Recommended retail price by manufacturer

199,00€ per unit incl. taxes

CUBE

DESCRIPTION

wavemaster CUBE is a high-quality, amplified stereo speaker system that lets you stream music from a Bluetooth-enabled smartphone, laptop or tablet with superb clarity. The compact and stylishly designed speakers are extremely versatile, allowing you to connect to 3 different audio sources simultaneously. The acoustically damped cabinets are fitted with high performance woofer/mid- range drivers, which provide exceptional audio reproduction.

Setting up CUBE is quick and easy. Alongside its Bluetooth wireless capability, it is also supplied with long, tangle-free cables, giving you maximum set-up flexibility. CUBE's unique dual-electronic amplification design, means that it deals with non-amplified sources like iPad/iPod/iPhone, PC, laptop, TV, CD and BluRay devices just as easily as powered sources. There is a dedicated line-in for mobile devices. With one eye on power-saving, CUBE has an intelligent standby feature that shuts your speakers down when not in use, but wakes instantly when an audio signal is detected.

SPECIFIES

- **Sound:** Stunning audio reproduction with exceptional bass performance (2-way concept, with bass reflex technology). Integrated volume control and sound control for bass and treble.
- **Speaker:** Compact designed, acoustically damped MDF cabinet with black coloured coating. High performance woofer/midrange driver with cellulose cone and silk dome tweeter.
- **Bluetooth®:** The integrated Bluetooth® module offers high quality audio streaming. It operates on the A2DP standard and is compatible with all devices using the Bluetooth® 2.1 standard.
- **Connection:** CUBE can be connected by Bluetooth® or by cable with up to 3 different stereo sound sources simultaneously. Sources can be selected by a line input switch that is located on the front of the speakers.
- **Auto-Switch:** CUBE detects input signals and automatically switches to the appropriate operation mode (On/Standby).
- **Eco Standby:** CUBE consumes less than 0.5 Watt in standby mode. The main power switch is located on the reverse of the speaker.
