| ColorBoost II+   | <b>Acer Color Boost II+ Technology</b><br>ColorBoost II+ is a advanced which refines the waveform to improve optical color performance based on lamp spectrum and color wheel properties. ColorBoost II+ brings (1) Natural color temperature: Improving natural color temperature from a refined waveform to achieve optical color balance. (2) Content-based color brightness improvement: Combining Acer eView Management which offers varied scenario modes with color-specific refined waveform to improve color brightness according to content |
| SpectraBoost     | <b>Acer SpectraBoost Technology</b><br>With Acer SpectraBoost technology, Acer projector performs 30% of NTSC color gamut increment, delivering outstanding color saturation among all competitor's products. Via the enhancement of color saturation, Acer projector provides most vivid and colorful image quality, no matter for a commercial presentation or a video playback.                                                                                                                                                                    |
| Wide Color Gamut | <b>N/A</b>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                            |

| EcoProjection | <b>Acer EcoProjection Technology</b><br>Acer EcoProjection is a complete environment-friendly power management solution that reduces standby power consumption by up to 80%, from 5 W to 1 W. With Auto ECO feature, projector will automatically enter ECO mode for saving power if there is no any signal input for 5 minutes. The power consumption can be reduced up to 20%. Also featured in the Acer EcoProjection suite is Acer ePower Management for customized power-saving configurations.                              |
| ColorSafe     | <b>N/A</b>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                        |
| ColorSafe II  | <b>ColorSafe II</b><br>Acer projectors featuring ColorSafe are virtually immune to color decay, such as the yellow or green tint on images displayed by some projectors that have been used for extended periods of time. Acer projectors take advantage of DLP® technology and also Acer unique color compensation technology on the optical components to guarantee picture integrity despite prolonged use. The extended lifespan and consistent image quality lower the total cost of ownership and translate to big savings. |
| DLP           |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                   |

|                                          |                                                                                                                                                                                                                                                                                                                          |
|------------------------------------------|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Empowering Technology                    | <b>Empowering Key</b><br>Featured on the remote control or projector control panel, the Empowering Key provides instant access to eProjection Management (on wireless models only), eView Management, eTimer Management and eOpening Management.                                                                         |
| eTimer                                   | <b>Acer eTimer Management (w/o audio alarm)</b><br>A digital clock that can be set by the user and displayed onscreen for convenient reference keeps presentations going at the right pace. Acer eTimer Management also features a visual countdown to warn the presenter when time is up.                               |
| eOpening or Customizable Startup Screen  | <b>N/A</b>                                                                                                                                                                                                                                                                                                               |
| Acer eView Management                    | <b>Acer eView Management</b><br>With Acer eView Management, adjusting projector settings to suit any environment and any type of content is fast and easy. Eight factory or user-defined presets instantly configure color, brightness and contrast to deliver best-quality images.                                      |
| Wall-Color Compensation/Black Board Mode | <b>Wall-Color Compensation</b><br>The wall-color compensation feature enables the projector to display colors accurately even when the image is projected on a colored wall. The user simply has to choose the wall color in the OSD menu, and the projector intelligently compensates the color of the displayed image. |

|                       |                                                                                                                                                                                                                                                                                                                   |
|-----------------------|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| ePower                | <b>Acer ePower Management</b><br>Acer ePower Management provides quick configuration of power management options, including controls for ECO Power On/Off, High Altitude mode and Auto Shutdown.                                                                                                                  |
| High Altitude Mode    | <b>High Altitude Mode</b><br>Since air density at high altitudes is low, a projector operating at elevated levels may automatically shut down to protect itself from overheating. High Altitude mode allows the projector to operate with faster fan speeds, thus preventing any damage even at higher altitudes. |
