

C-HDMI-51

5-Port
Multimedia HDMI
Switch

Never again run out of HDMI ports for your devices

The Plug and Play 5-Port self-powered HDMI Switch

Do you have more HDMI devices than you have free ports on your TV or Monitor?

The new LMS Data **C-HDMI-51** is a low-cost but highly effective HDMI switch that allows you to add almost any HDMI input device such as media centres, BluRay(tm), game consoles and much more besides.

With its highly compact and stylish design, totally self-powered via the HDMI cable input signal. The on-board HDMI ports are gold plated to aid electrical conduction and help anyone enjoy up to 1080p video and of course HD quality sound.

Installation takes just a few moments and comes with a supplied infra-red remote control (battery included) which allows easy HDMI source switching from the comfort of your chair. Also bundled is a separate infra-red receiver module so there is no more frustration about trying to switch HDMI channels, like on some other lesser HDMI switch brands.

The C-HDMI-51 is also at home with HDMI computer switching and is perfect for users of multiple HDMI sources such as Macs, PCs and other HDMI devices that need to share a single HDMI ready monitor.
