5 YEAR WARRANTY PRO SERIES

Tempo SSD Pro Plus
6Gb/s SATA DUAL 2.5" SSD PCIe CARD WITH eSATA PORTS
TSATA6-SSDPS-E2

Mac & Windows COMPATIBLE
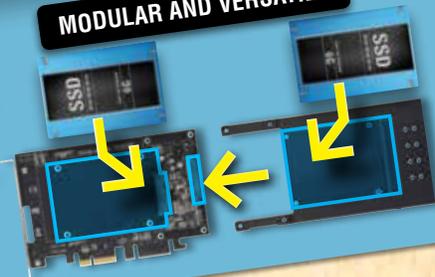

OR

**MODULAR AND VERSATILE**

SUPERIOR PERFORMANCE

TEMPO SSD
Features a unique modular design. Out of the box, this Sonnet solution is a half-length, full-height card to which you attach one SSD. With the included extension plate attached, the Tempo SSD is transformed into a full-length card to accommodate an additional SSD. Adding the second SSD allows you to improve performance or data security by exploiting OS X or Windows RAID features. This card delivers read speeds up to 660 MB/s from a pair of SSDs configured as a RAID 0 set.

TEMPO SSD PRO PLUS
Is a full-length, full-height card to which you attach two SSDs and connect two external storage systems. If you've got the space and need the even greater performance possible, this is the card for you. This card is performance-engineered to deliver read speeds up to 960 MB/s from a pair of SSDs or external drives configured as a RAID 0 set. It is backed with Sonnet's Pro 5-year warranty.

Read Performance	960 MB/s
Write Performance	810 MB/s

Tempo SSD

Simple SSD Upgrade Solutions, Plus More
If you've been thinking about storage, you know that SSDs are a hot option. Offering performance that easily outperforms hard disk drives, they are also more reliable, and their prices keep dropping so you can get more capacity than ever. If you've got a Mac Pro tower or Windows desktop computer, you *could* get a couple of 2.5" SSDs (plus necessary adapters) and install them in empty drive bays (if there are any), *but* the 3Gb/s SATA interface in your computer won't support fast 6Gb/s SSDs at full speed. Sonnet engineered a couple of great alternatives—**Tempo SSD Pro Plus** and **Tempo SSD**. They're fast 6Gb/s SATA PCI Express adapter cards that enable you to attach widely available 2.5" SSDs and install the assembly neatly into a single PCIe slot, no cables or drivers necessary.

Add High Speed Storage Alongside Your Other PCIe Cards

Echo Express III-D

New Mac Pro

Tempo SSD Pro Plus

Tempo SSD Pro Plus and RED ROCKET-X cards installed in an Echo Express III-D Thunderbolt 2-to-PCIe card expansion chassis make a powerful combination

These Tempo cards use widely-available, standard 2.5" SATA SSDs that you choose and install. This allows you to select from the widest variety of SSDs, and buy the ones that best suit your capacity and performance needs while working within your budget. Installation is simple—attach your SSDs with provided screws, mount the card in an available PCIe slot, and turn on your computer—the necessary drivers are installed automatically. You can even install operating system software and boot* directly from an SSD! If you need to add more storage, the Tempo SSD Pro Plus also sports two eSATA ports, making it easy for you to connect additional external storage systems with eSATA interfaces like Sonnet's Fusion QR.

Thunderbolt Port? Instant SSD Solutions
Got a Thunderbolt connection, but no PCIe slot? Tempo SSD cards are optimized for use in Sonnet's Echo Express SE I, Echo Express SE II, Echo Express III-D and III-R, xMac mini Server, and xMac Pro Server Thunderbolt 2-to-PCIe card expansion systems. These Sonnet cards are perfect companions for your pro video capture and processing, digital audio interface, or DSP accelerator card, providing blazing fast storage in the same box!

PLUS eSATA Connections
Connect one or two eSATA ports to external storage systems with eSATA interfaces. Tempo SSD Pro Plus supports Sonnet's exclusive eSATA data cables with locking connectors that provide secure connections at both ends.

eSATA Port

eSATA Port

Fusion™ QR

Desktop 4-Drive Hardware RAID 5 SATA Storage System with Quad Interface

- PCIe cards with high-performance SATA controllers
- Support standard 2.5" SSDs—add your own SSDs
- Read speeds up to 960 MB/s (Tempo SSD Pro Plus) or 660 MB/s (Tempo SSD)
- Optimized for maximum performance over Thunderbolt 2
- Supports connection of two external storage systems with eSATA interfaces (Tempo SSD Pro Plus)
- Supports OS X and Windows RAID features
- Drive health monitoring with S.M.A.R.T. data reporting

Mac Pro, Echo Express III-D, Fusion QR, Red Rocket-X, and SSDs not included

NEW

Tempo™ PCIe SSD
PCI EXPRESS® SSD CARD
PCIE-SSD1-512-E

512 GB SSD

INCLUDED

Read Performance	1100 MB/s
Write Performance	1100 MB/s

Tempo PCIe SSD adds 512 GB of high-performance, low-latency storage to your computer. This low-profile x4 PCIe 2.0 host card installs easily into a computer's PCIe slot to deliver data transfers of up to 1100 MB/s without RAID 0! Optimized for Thunderbolt, this card is also perfect for adding more high-speed storage in any Thunderbolt 2-to-PCIe expansion system. You can even boot from an installed operating system!

- Low-profile x4 PCIe 2.0 card with one 512 GB PCIe SSD
- Optimized for use over Thunderbolt 2; 1100 MB/s read, 1000 MB/s write
- Supports booting under OS X 10.9.2+
