

TUMNUS

WAMPLER[®]

BUILT IN USA

I'm guessing you've seen the prices of some of the vintage effect pedals on eBay these days? Certain pedals are literally going to several thousand dollars - why? Well, because they sound AMAZING and they have a myth, a legend attached to them - helped all the more by a healthy amount of PCB goop and the fact they aren't made any more...

There have been many clone of the most popular, many that claim to bring you the original parts used in the original way, recreating something based on it's outer pain colour. Here's the thing, we ALL know that each of these pedals were different, it had nothing to do with the paint, it had everything to do with what the designer felt worked best at that moment in time.

We decided that enough was enough, we got frustrated with people charging hundreds of dollars for a copy that claimed to contain the magic fairy unicorn dust NOS parts, and decided it was time to put this to rest!

Brian took several of the original and designed the Tumnus to sound like the best bits of all of them, make the ultimate tribute to that circuit - and make it with modern high quality parts so each sounds as amazing as the last!

Whether you want to use this pedal as an OD or a boost, you can be sure that all of the low end is present, and beautifully warm, the mid hump is placed perfectly and the gain itself is to on point you will finally understand what all the hype has been all about.

In order to get the best out of your new pedal, we recommend you spend some time getting to know the controls as well as understand how they all work together. This kind of circuit is the most responsive around, and you can get so many tones from it... it's really worth spending lots of time playing with it and see what it does. Try it as a boost with the gain down or as a OD pedal with the gain up, it just makes everything sound better!

Bypass - a hardware mechanical true bypass stomp switch to ensure your tone is intact when the main circuit is bypassed. You'll know when the pedal is 'on' as the LED lights up!

Gain - Quite self explanatory! This adds grit and dirt to the effected signal. Start with it all the way off (counter clockwise) and up the volume from unity and you have an amazing boost, it will fatten up your tone remarkably... When you bring the gain control up the glorious thickness this pedal is famous for appears - as a stand alone boost, overdrive or pre gain boost, this is the key to finding you tone.

Volume - You guessed it, this is where the level comes from. You will probably want to start at an equal volume to it bypassed, unity. You'll probably be surprised that this is much lower than other OD pedals, this is because one of the features of this pedal is the headroom in it to act as a pre gain boost.

Treble - Adds top end to the signal. Once again, this is extremely usefull if you use the pedal as a pre gain boost or overdrive as it's the top end that makes your tone cut through the mix!

POWER - Please note, this circuit has an internal charge pump that increases the current to about 18v. Please do NOT put any more than 9v into this pedal, because if you do it will literally melt the insides down!

Suggested Settings

Loud and Clear

Adding a touch of clarity while boosting the front of your amp.

Man that's Hot

Adding some fatness and depth, along with some grit to your tone.

Something Sweet

Lightest bit of gain to smooth out your tone and fatness to make lead lines sing

Rock and Roll Overdrive

Sustaining rock tones that can be dialed in perfectly with your guitars volume.

WAMPLER Pedals Limited Warranty. WAMPLER offers a five (5) year warranty to the original purchaser that this WAMPLER product will be free from defects in material and workmanship. A dated sales receipt will establish coverage under this warranty. This warranty does not cover service or parts to repair damage caused by accident, neglect, normal cosmetic wear, disaster, misuse, abuse, negligence, inadequate packing or shipping procedures and service, repair or modifications to the product, which have not been authorized by WAMPLER. If this product is defective in materials or workmanship as warranted above, your sole remedy shall be repair replacement as provided below.

RETURN PROCEDURES. In the unlikely event that a defect should occur, follow the procedure outlined below. Defective products must be shipped, together with a dated sales receipt, freight pre-paid and insured directly to **WAMPLER SERVICE DEPT – 3383 Gage Ave., Huntington Park, CA 90255, USA.** A Return Authorization Number must be obtained from our Customer Service Department prior to shipping the product. Products must be shipped in their original packaging or its equivalent; in any case, the risk of loss or damage in transit is to be borne by the purchaser. The Returns Authorization Number must appear in large print directly below the shipping address. Always include a brief description of the defect, along with your correct return address and telephone number.

When emailing to inquire about a returned product, always refer to the Return Authorization Number. If WAMPLER determines that the unit was defective in materials or workmanship at any time during the warranty period, WAMPLER has the option of repairing or replacing the product at no additional charge, except as set forth below. All replaced parts become a property of WAMPLER. Products replaced or repaired under this warranty will be returned via ground shipping within the United States freight prepaid. WAMPLER is not responsible for costs associated with expedited shipping, either to WAMPLER or the return of the product to the customer.

INCIDENTAL OR CONSEQUENTIAL DAMAGE. In no event is WAMPLER liable for any incident or consequential damages arising out of the use or inability of the possibility of such damages, or any other claim by any other party. Some states do not allow the seclusion or limitation of consequential damages, so the above limitation and exclusion may not apply to you. This warranty gives you specific legal rights and you may also have other rights which may vary from state to state.

FOR YOUR PROTECTION. Please complete the online warranty registration within (10) ten days of the date of purchase so that we may contact you directly in the event of a safety notification issued in accordance with the 1972 Consumer Product Safety Act.

This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation.

This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantees that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures.

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and the receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experience radio/TV technician for help.

Changes or modifications not expressly approved by the party responsible for compliance could void the user's warranty to operate the equipment.

CUSTOMER SUPPORT. Our dedicated staff is ready to help you with any warranty or product questions – please email us at help@wamplerpedals.com or call us on (765) 352-8626

Please remember to register your pedal as soon as possible after purchase at the following web page to ensure quicker service if you should ever need to make a warranty claim:
